

On this page we present sematic frames in FrameNet style for machine learning domain in XML format:

1. [Algorithm](#)
2. [Data](#)
3. [Error](#)
4. [Experiment](#)
5. [Measure](#)
6. [ML_Task](#)
7. [Model](#)
8. [Task_Solution](#)

We publish a corpus of annotated sentences from *Machine Learning Journal* for each Frame. It exists at most one sentence for a single article in our corpus. You can load files on FrameNet site https://framenet.icsi.berkeley.edu/fndrupal/annotation_tool

!!! It is gradually supplemented

Corpuses for frames:

1. [Algorithm Corpus](#)
2. [Data Corpus](#)
3. [Error Corpus](#)
4. [Experiment Corpus](#)
5. [Measure Corpus](#)
6. [Task Corpus](#)
7. [Model Corpus](#)
8. [Task Solution Corpus](#)
